Figure 1: Use Case Diagram

What a parishioner and a parish administrator can each do in SanctiWalk

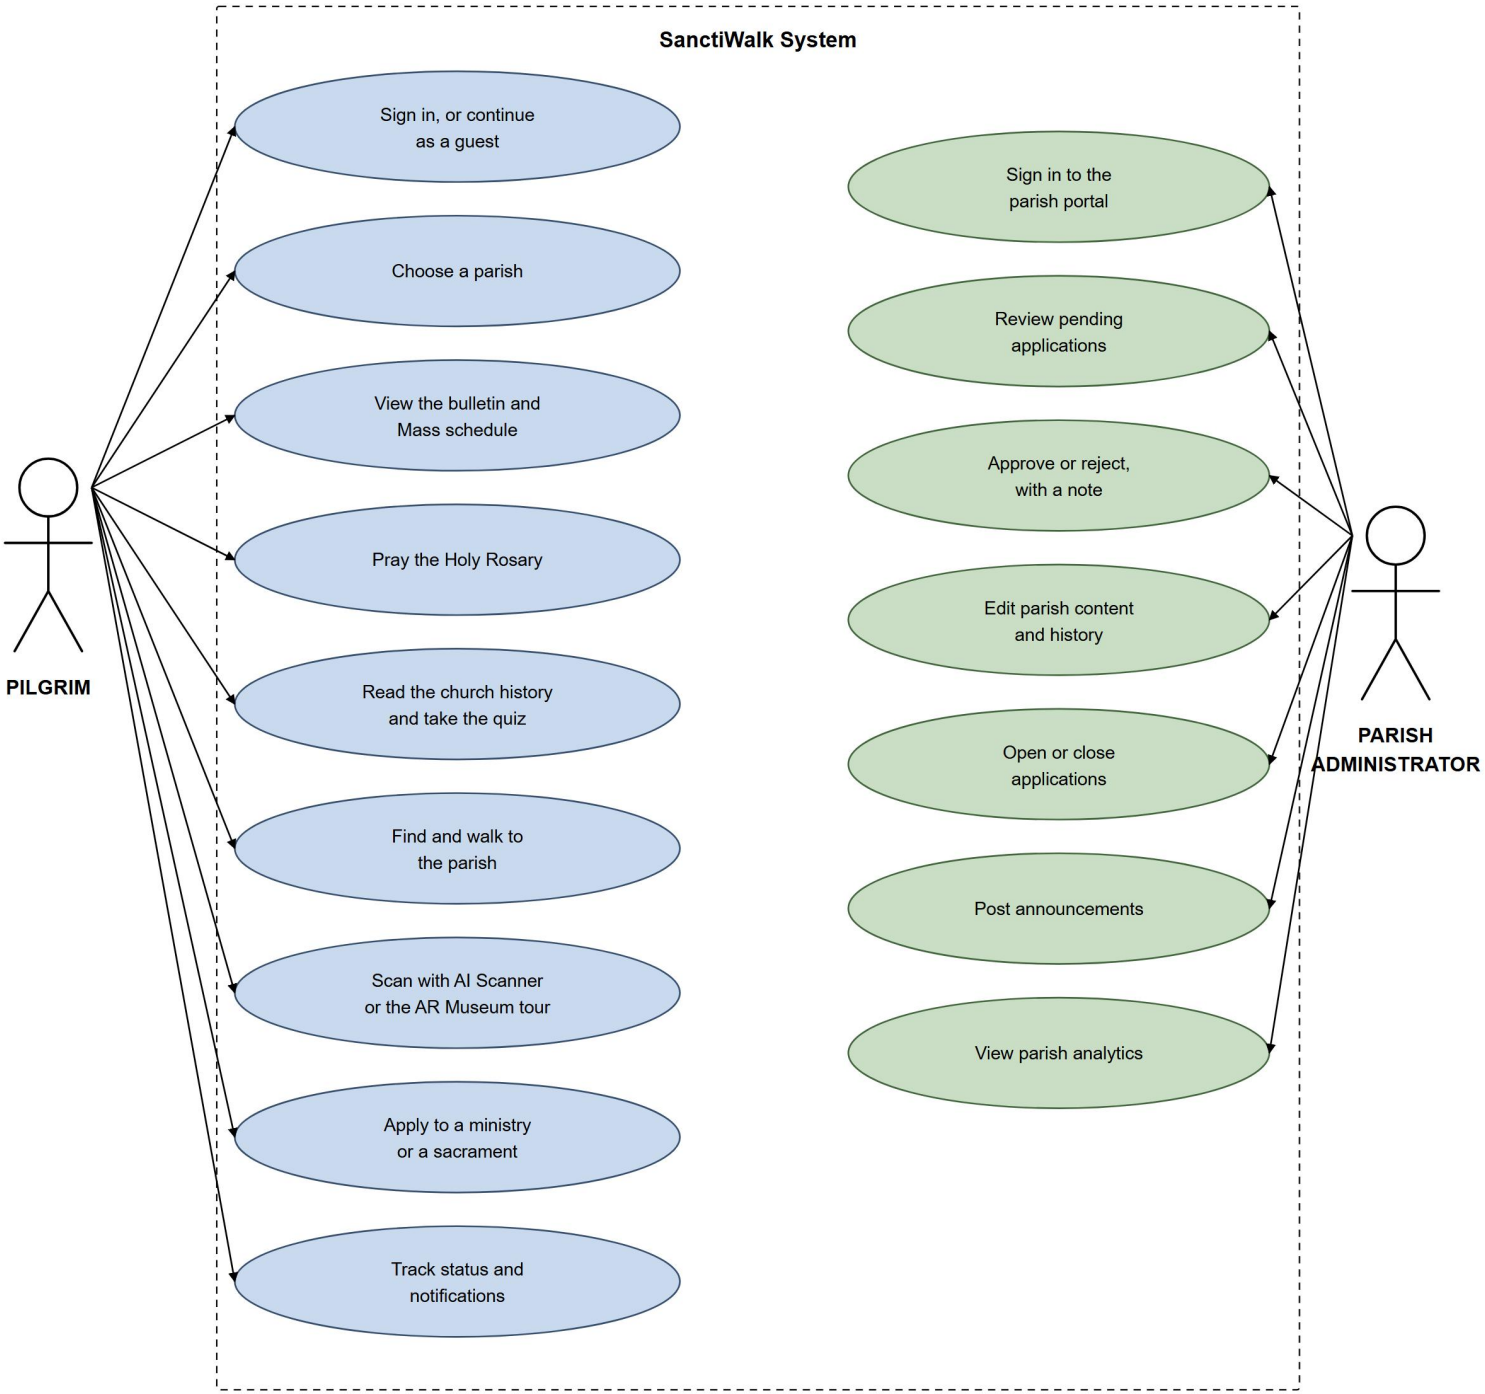

Figure 2: Flow Chart (User Side)

A parishioner's path through SanctiWalk, from opening the app to the feature they came for

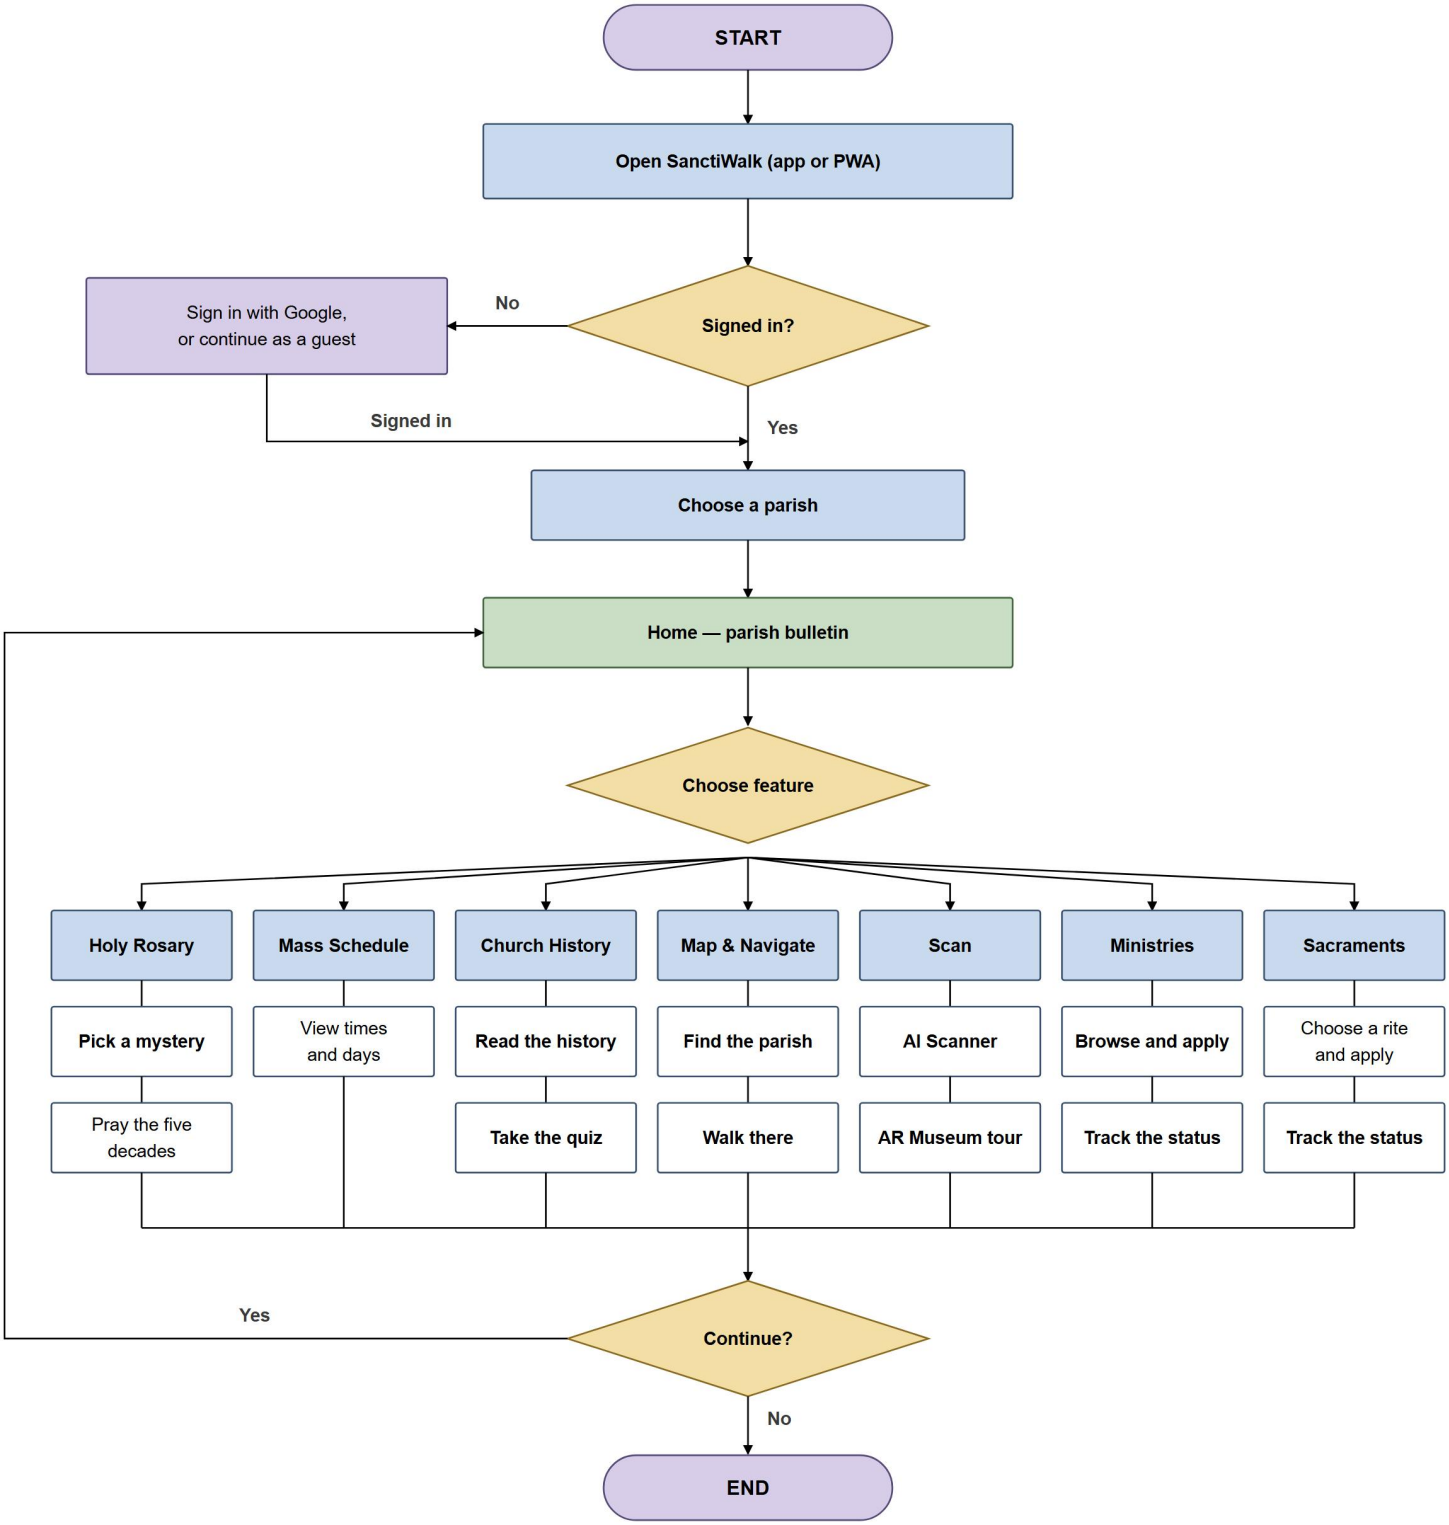

Figure 3: Flow Chart (Admin Side)

A parish administrator's path through the portal, which appears only for a listed administrator

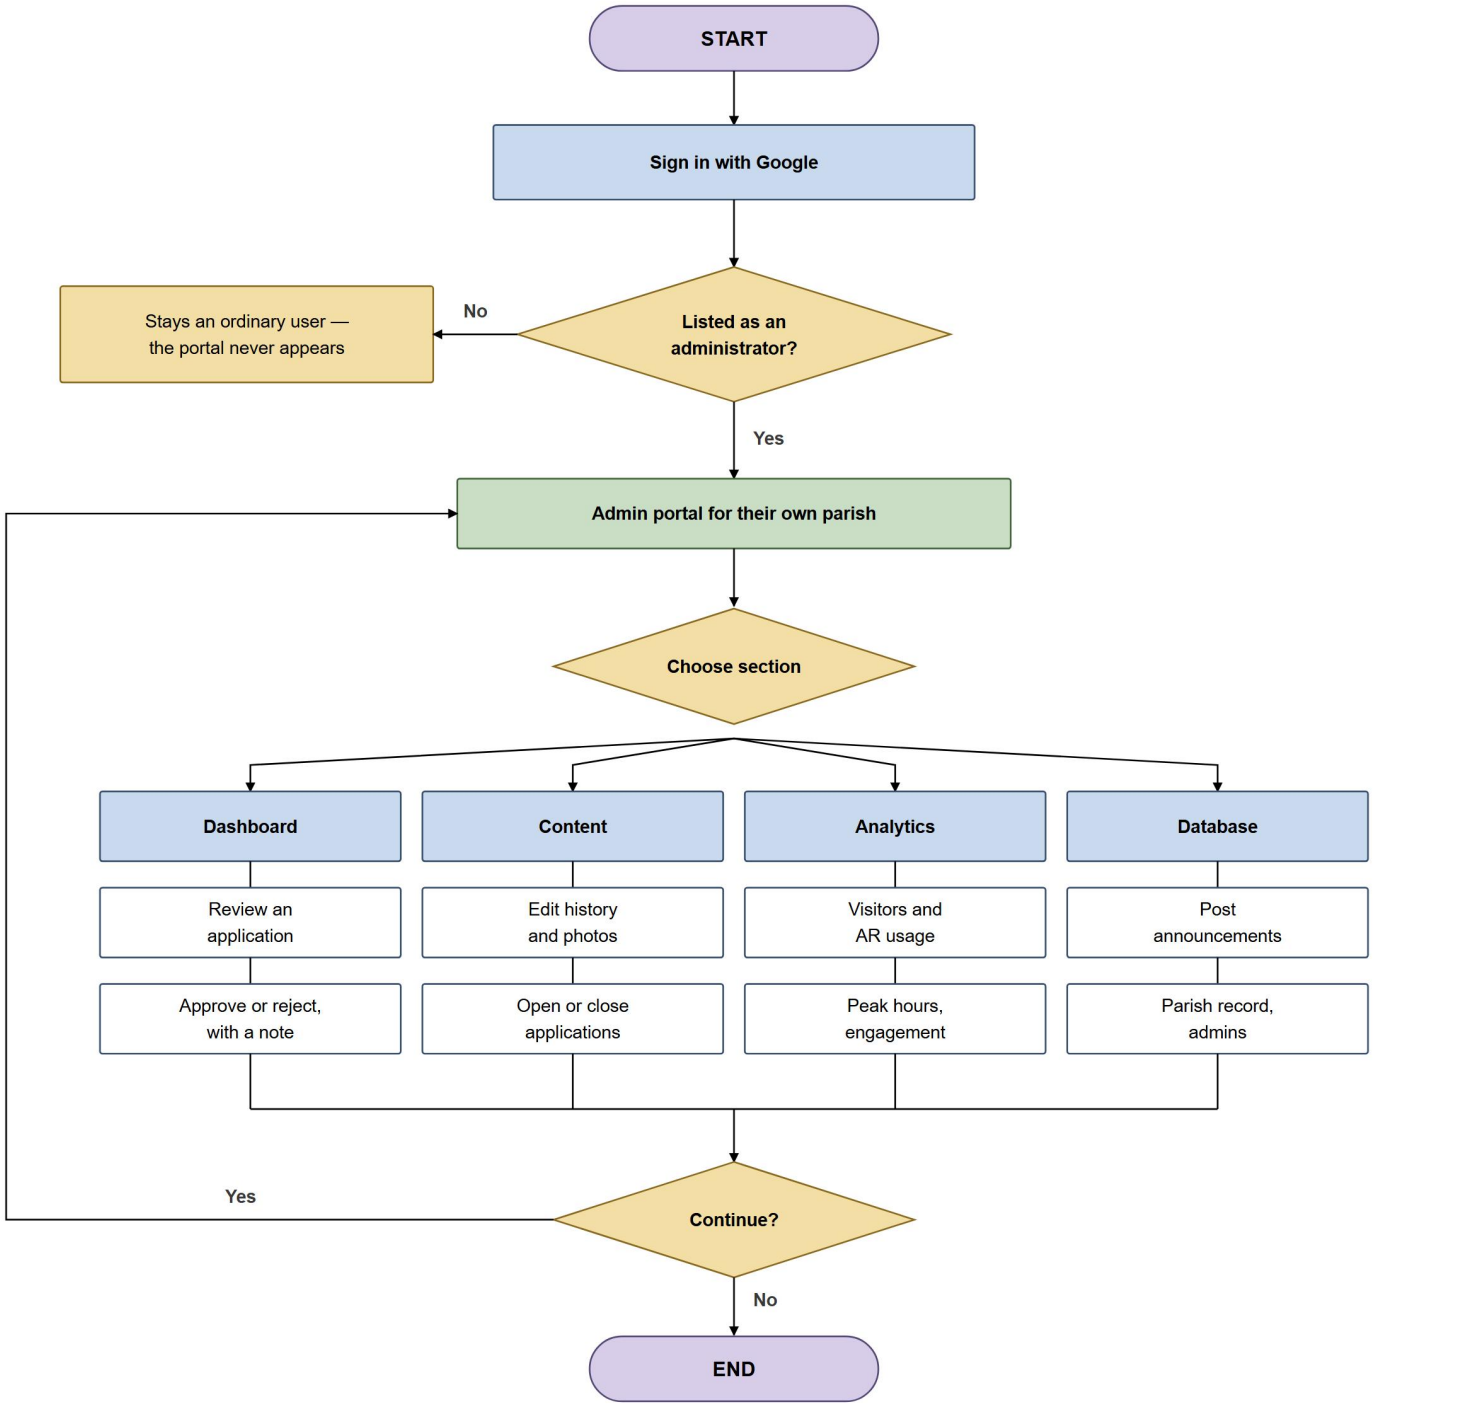

Figure 4: Data Flow Diagram (Level 0)

SanctiWalk as a single process, and everything outside it that it exchanges data with

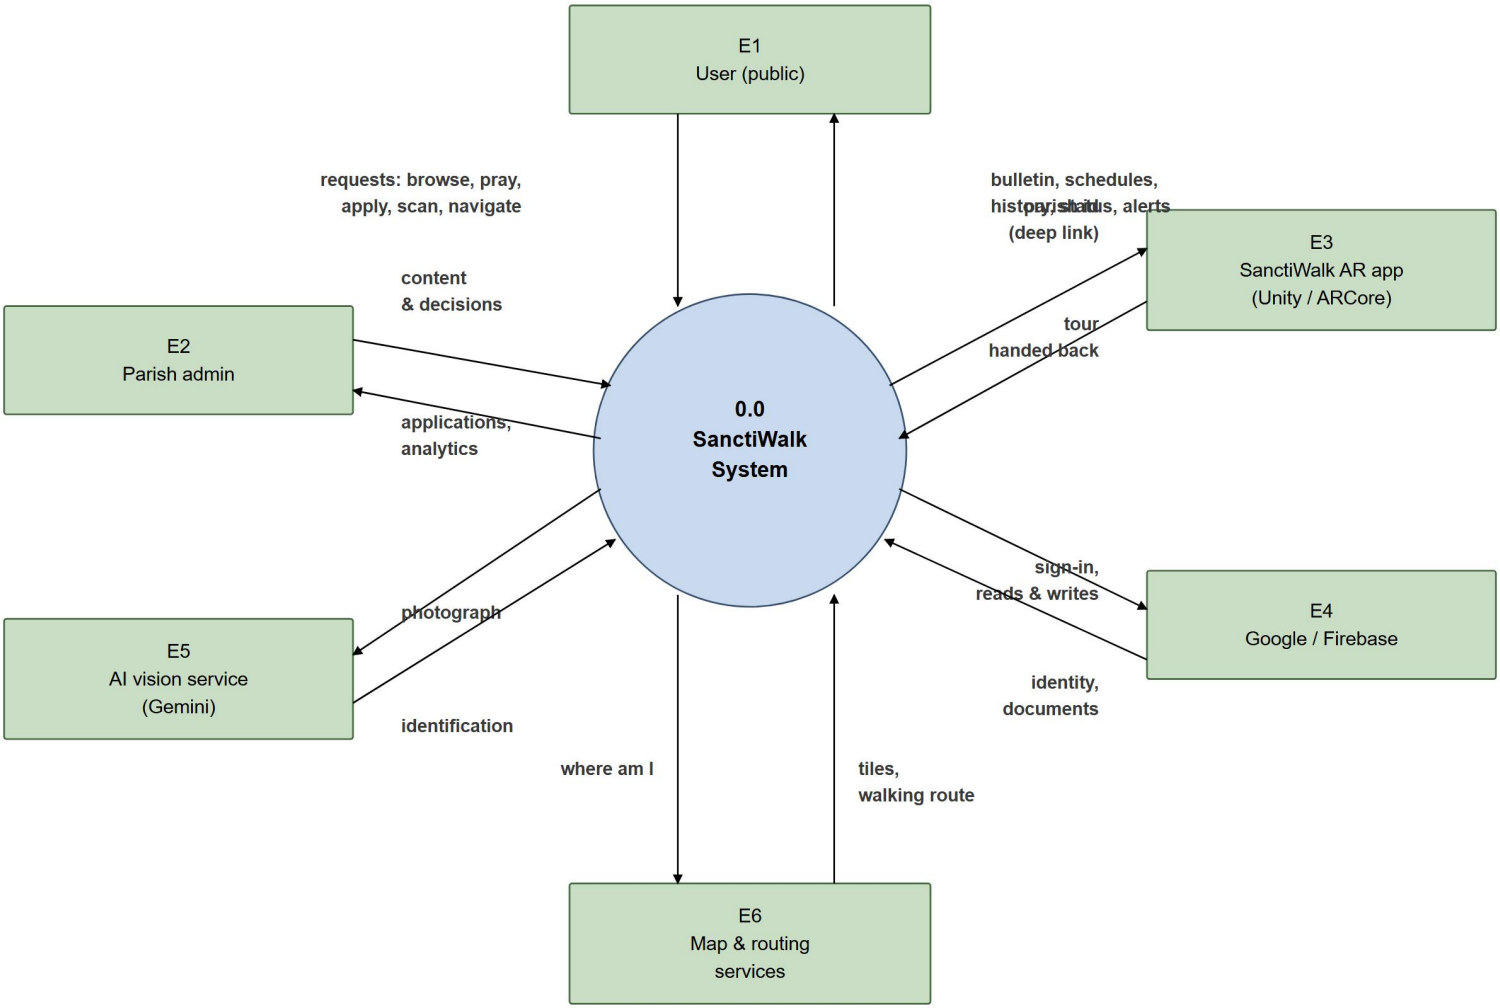

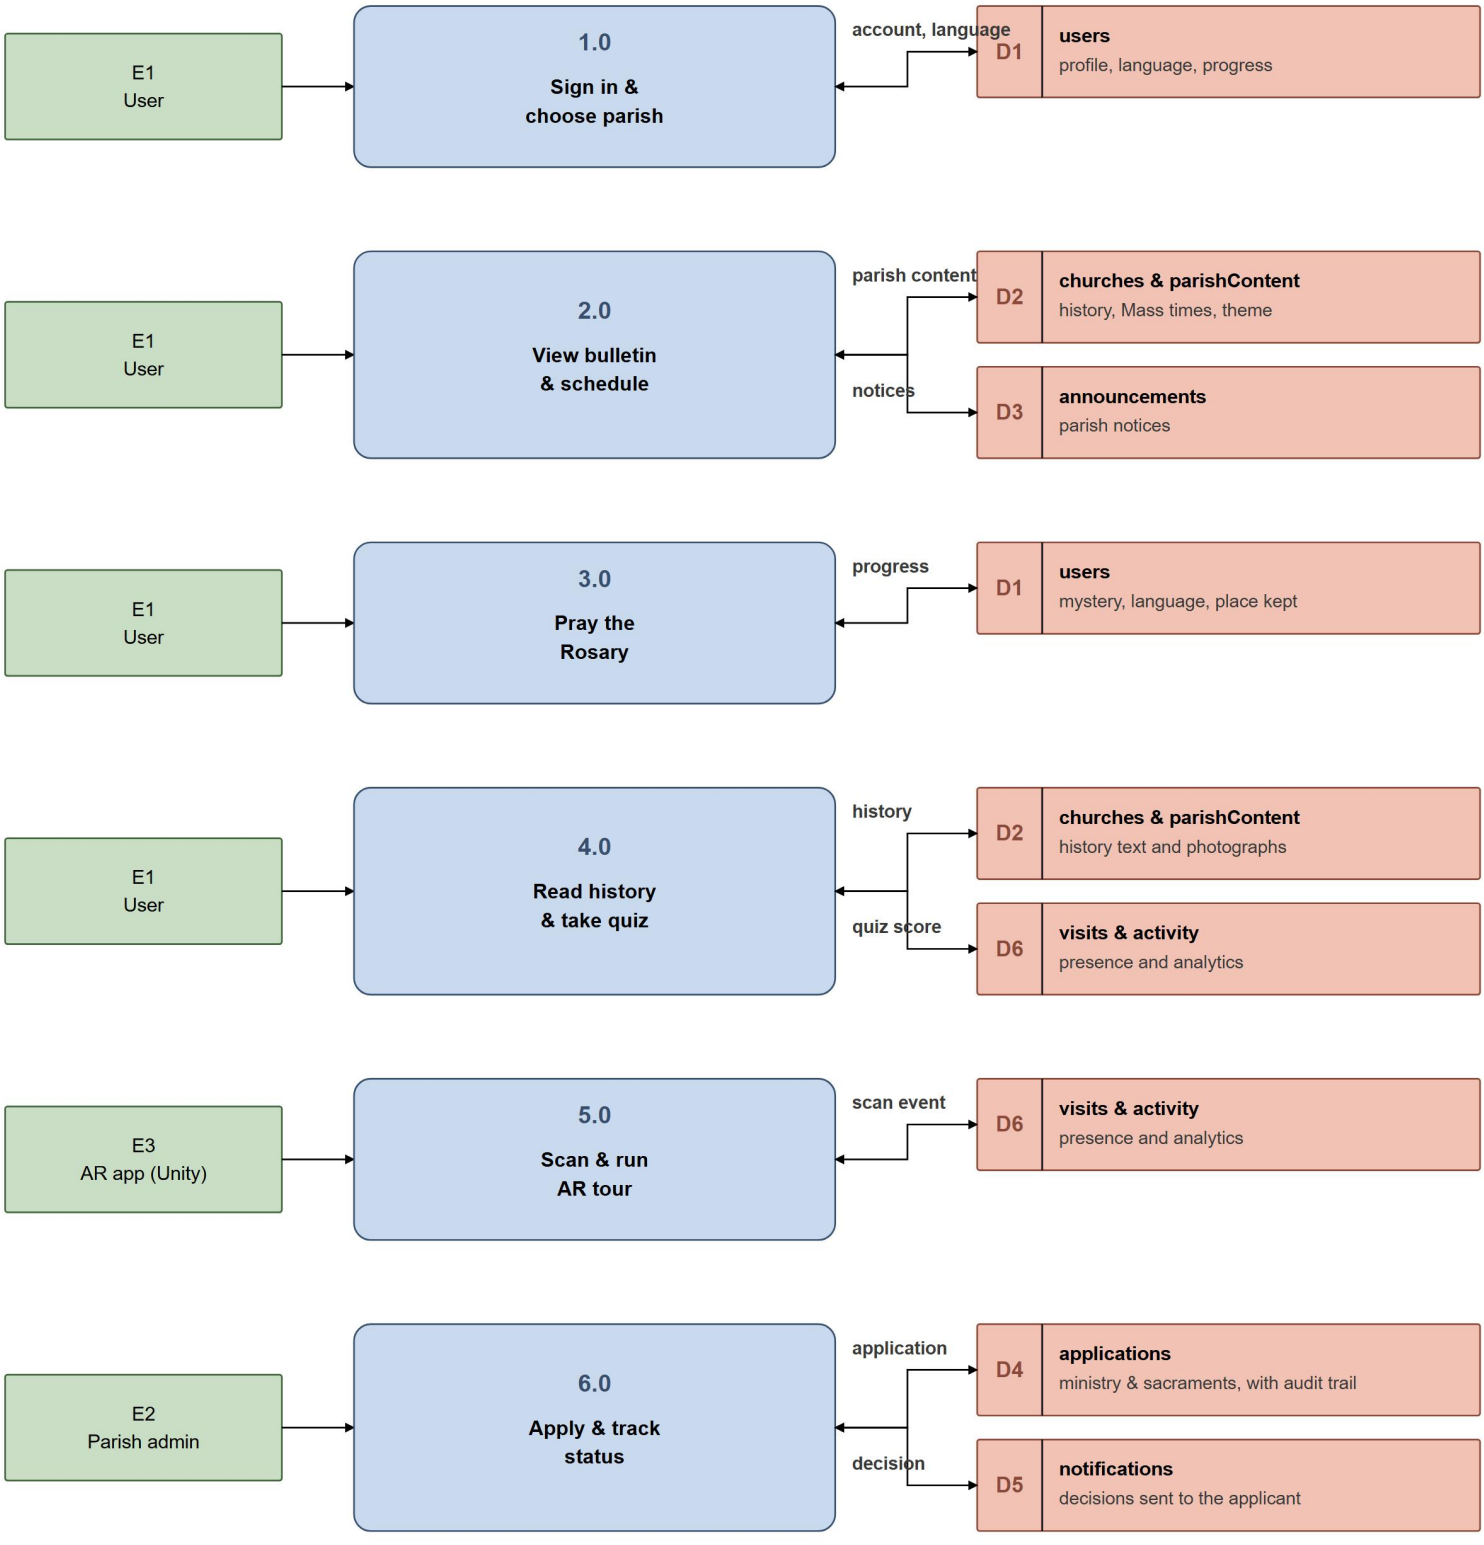

Figure 5: Data Flow Diagram (Level 1)

One process per row, with the entity it serves and the data stores it reads and writes

LEGEND

- External entity (square)
- Process (rounded)
- Data store

Figure 6: Entity-Relationship Diagram

Cloud Firestore. PK = document id, FK = a reference to another collection. There are no joins; references are resolved by the client.

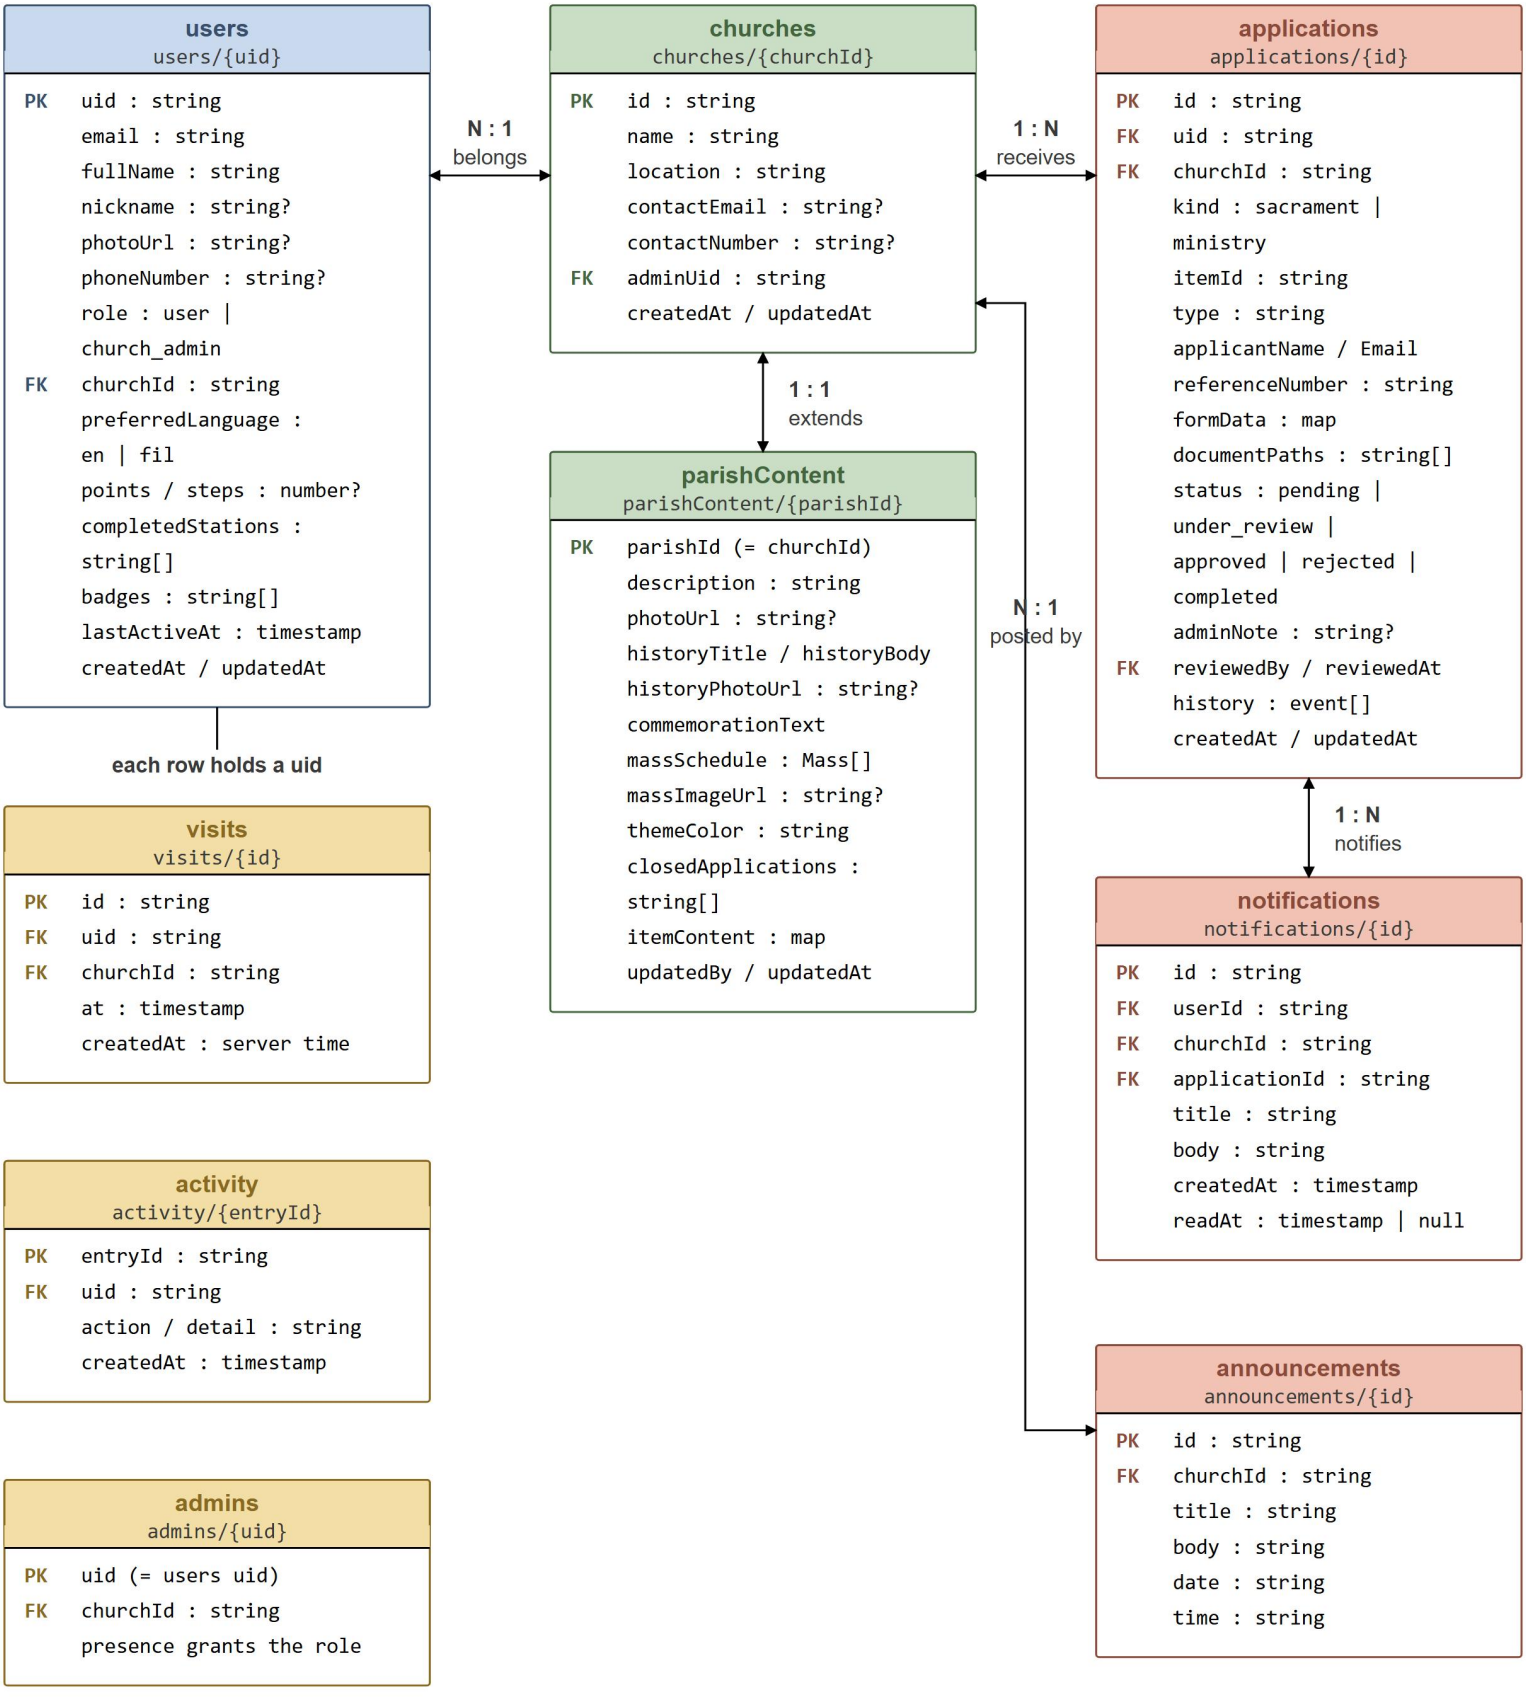

Figure 7: HIPO Chart (User Side)

Visual table of contents for the parishioner's side of SanctiWalk

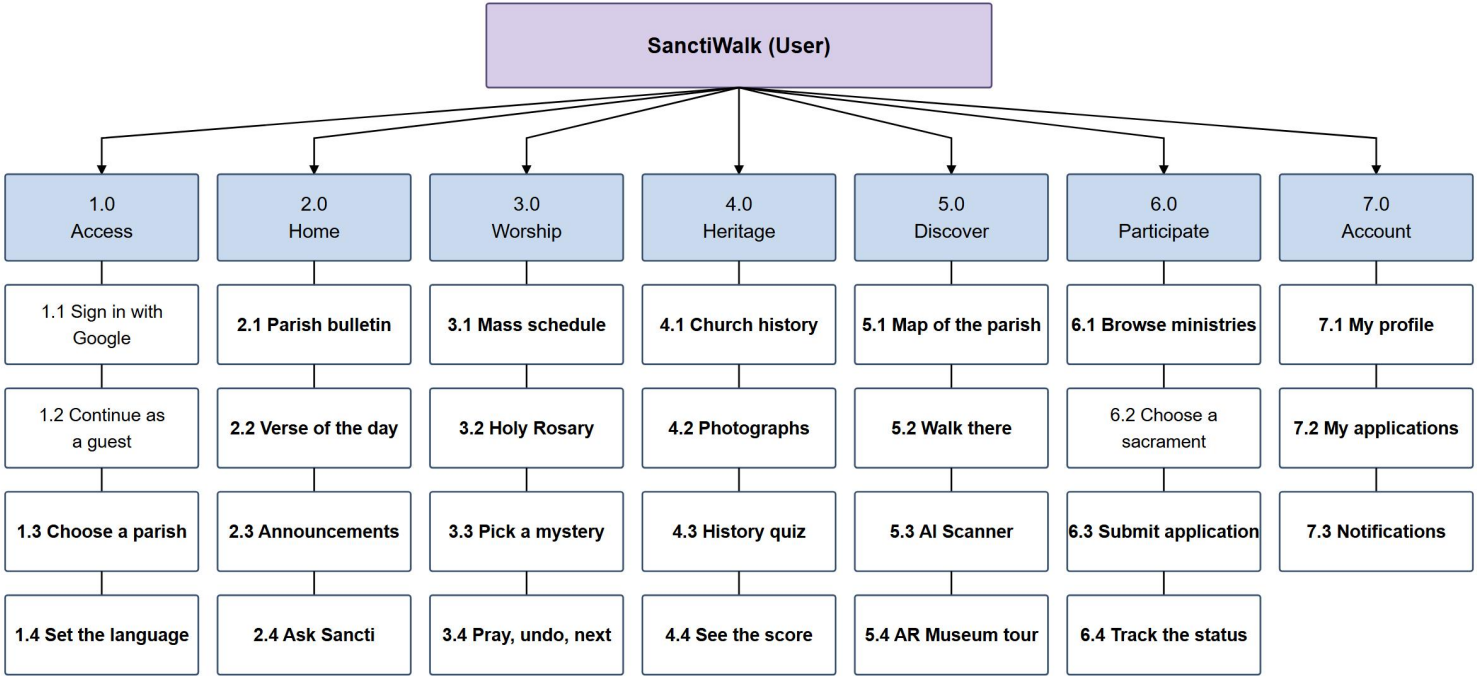

Figure 8: HIPO Chart (Admin Side)

Visual table of contents for the parish office portal
